The Health Australia Party (HAP) is a true centre party committed to promoting open and transparent Government decision making, balance and honesty of information, and stimulating individual freedom of choice and thought - to ensure we have a genuinely Healthy Australia.

*Only if Australians can come together, rather than fragment, will the ongoing health, affluence and lifestyle of our country be assured. So the HAP is creating a new paradigm:*

- ✧ *A middle ground where Australians can come together, seek consensus and share values and aspirations.*
- ✧ *A new political space based on grass roots consultation, transparency and relevance that aims to improve the health of the Nation starting with the health of individual citizens, through to local councils, to state and territory governments, and finally to the national government and international alliances.*

---
