OFFICIAL STATEMENT

The November 2022 Victorian Election – Goals If Elected

In June 2022, HAP co-founder Dr Isaac Golden outlined on the HAP Facebook page our main first-term goals if we have candidates elected to the State Parliament.

With less than three months to go it is worth restating our main goals:

1. Repeal anti-democratic legislation introduced by the Andrews Government over the last 2 years. Work with other Parties and parliamentarians to make this happen.
2. Repeal the No Jab, No Play legislation which discriminates against unvaccinated children for no good medical reason, just punishment. Ensure that other Parliamentarians understand the facts behind this legislation which is based on non-science
3. Begin a thorough, open, public review of the Victorian Government's handling of COVID covering ALL aspects of the response, including health advice by "experts" which proved to be dangerously wrong. Hold individuals to account.
4. Work to change the pharmaceutically dominated health system in Victoria. Suggest a new model focused on health creation rather than disease management which is the focus of the current system.
5. Propose new legislation to better protect the environment and reduce pollution in Victoria. There is so much that can be done NOW with simple, practical, inexpensive measures to expose and stop greed and corruption damaging our precious natural resources.
6. Help to begin economic repair in this State by supporting useful and practical suggestions and encouraging appropriate reforms. Help small business flourish without being harmed either by pressure from large corporations, restrictions imposed by bureaucratic rules and regulations, and unreasonable union demands.
7. Make Melbourne the NO.1 most livable city again, and Victoria a great State in which families flourish, and democracy is restored.

FREEDOM, PROSPERITY, HEALTH
